

The Futures Initiative and HASTAC@CUNY

Changing the Way We Teach and Learn

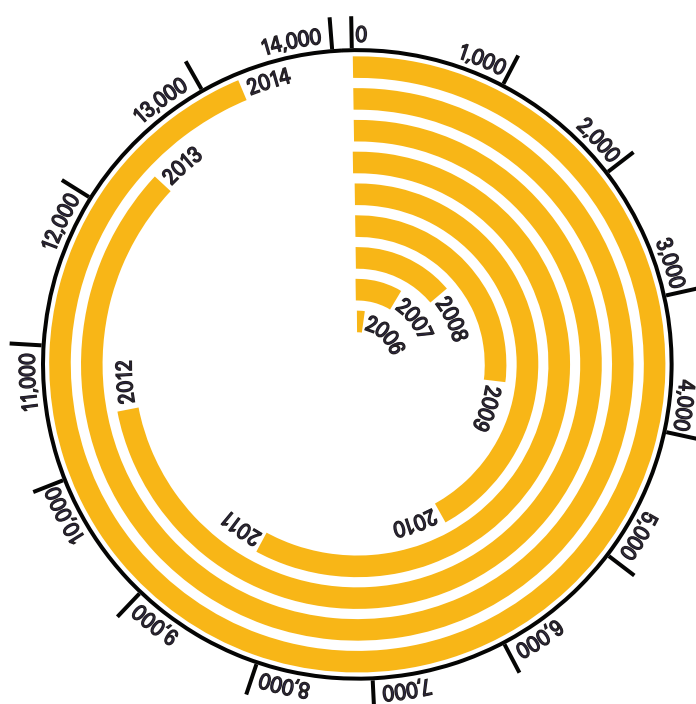

HASTAC is an alliance of more than 13,000 humanists, artists, social scientists, scientists, and technologists working together to transform the future of learning.

Since 2002, HASTAC ("haystack") has served as a community of connection where members share news, tools, research, insights, and projects to promote engaged learning for a global society. Issues of access and equality are as important to HASTAC's mission as the latest technological innovations; creative contribution is as important as critical thinking. We are dedicated to sharing information, ideas, and practices about the future of learning.

Join Us!

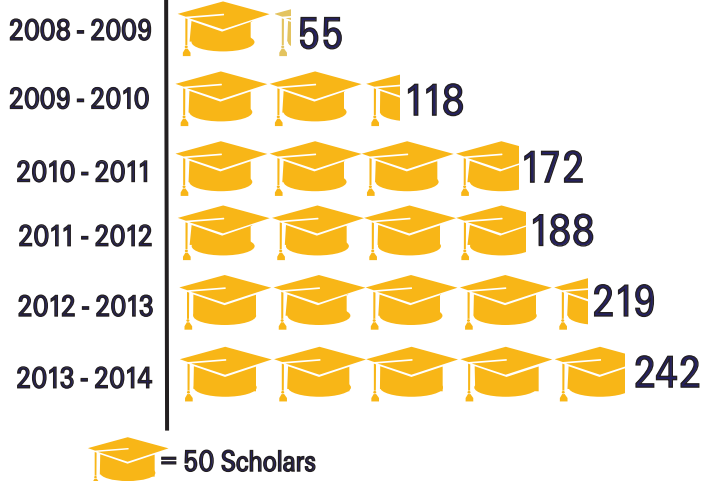

HASTAC is a free and open access community. By registering on hastac.org, you can receive newsletters and announcements, blog your ideas and questions, join relevant groups, post funding and job opportunities, showcase new tools, find collaborators for projects, and share CFPs.

HASTAC's online community has increased from a few hundred to 13,000+ network members worldwide

HASTAC Scholars fellowship program has grown from 55 students in 2008-2009 to 242 students in 2013-2014

The HASTAC Scholars fellowship program is a student-driven community of graduate and undergraduate students who are working at the intersection of technology and the arts, humanities and sciences. Their work centers on rethinking pedagogy, learning, research, and academia for the digital age.

The Futures Initiative is dedicated to creating and inspiring new methods of interdisciplinary and collaborative learning and pedagogy in order to stimulate institutional changes in higher education. Drawing upon and catalyzing the energy of CUNY faculty and students, the Futures Initiative seeks to explore new models for empowering the next generation of intellectual leaders to teach and engage in research most effectively in our modern age. The Futures Initiative encourages peer-to-peer pedagogies that support open and connected forms of learning, experimentation, and multimedia publication. Housed at the Graduate Center and extending throughout the CUNY system, the Futures Initiative serves as a model for innovation and aims to inspire public reinvestment in higher education and in our collective future as a society.
